

## Adding Integers (A)

Use an integer strategy to find each answer.

$22 + (-23) =$

$3 + 12 =$

$30 + (-12) =$

$7 + 22 =$

$39 + 47 =$

$(-29) + 20 =$

$(-45) + (-1) =$

$(-29) + (-34) =$

$(-19) + (-44) =$

$(-27) + (-19) =$

$9 + (-29) =$

$(-19) + (-30) =$

$11 + 16 =$

$(-49) + 32 =$

$8 + 14 =$

$(-12) + (-16) =$

$(-18) + (-42) =$

$(-18) + 3 =$

$44 + (-31) =$

$38 + 49 =$

$13 + (-33) =$

$(-42) + 41 =$

$(-33) + (-3) =$

$(-29) + (-45) =$

$(-47) + 31 =$

$(-34) + 18 =$

$(-15) + 42 =$

$1 + 37 =$

$(-49) + 7 =$

$36 + 17 =$

Use a number line to show this addition problem.

$$-5+8$$

Write an addition problem for problem shown on the number line.

Write an addition problem to describe the situation. Then answer the question.

I dove under the water 10 feet, then swam up toward the surface 3 feet, and back down 12 feet. Where am I currently in the water?
